

Create custom feedback form with thumbs up and thumbs down icons instead of buttons

 This page demonstrates how to use ConfiForms [REST API](#) with a bit of custom scripting to enable quick feedback form

We have a very simple form

CONFIFORM

ConfiForms Form Definition | formName = feedbackForm

CONFIFORM

ConfiForms Form Field Definition | fieldName = feedback | fiel...

CONFIFORM

ConfiForms Form Field Definition | fieldName = comment | field...

With little bot of scripting to build custom UI for ConfiForms form

```
HTML

```

```
HTML

<form class="gui" style="display:none" id="fform">
  <textarea id="mycomment" class="textarea" cols="7" rows="4"></textarea><br/><input type="button" class="gui-button" value="Send" id="sendcomment"/>
</form>
```

And some glueing code to link these parts together. See storage format below for the complete solution

Storage format for the solution

```
<ac:structured-macro ac:macro-id="016628d1-7649-46d0-9da1-738e6db4ef84" ac:name="conform" ac:schema-version="1">
