

Sticky box

This macro renders a "sticky box" at the position you say with the contents you put inside the macro body

```
## Sticky box macro by Vertuna LLC
## @param Width:title=Width|type=string|required=true|desc=Width in pixels (numeric)
## @param Height:title=Height|type=string|required=true|desc=Height in pixels (numeric)
## @param Top:title=Top|type=string|required=true|desc=Top in pixels (numeric)
## @param Left:title=Left|type=string|required=true|desc=Left in pixels (numeric)
<div style="position:absolute; z-index:9999; width:${paramWidth}px; height:${paramHeight}px;top:${paramTop}px;
left:${paramLeft}px">
$body
</div>
```

How it renders see right here - red error box rendered at specified position

Macro Browser Information

Macro Name*

sticky-box

Macro names are converted to lower case

Visibility

☒ Visible to all users in the Macro Browser

☐ Visible only to system administrators in the Macro Browser

Macro Title*

Sticky box

Description

Categories

Administration
Communication
Confluence content
Development
External content

Icon URL

Absolute URL (e.g. http://mysite.com/myimage.png), or relative to the Confluence base URL (e.g. /images/logo/confluence_48_white.png)

Documentation URL

Definition of User Macro

Macro Body

☐ No macro body

Processing

☐ Escaped

☐ Unrendered

☒ Rendered

You should use this option for bodies that are processed within the template before being output. Ensure that HTML is ultimately output by the template.

The body will be rendered so most HTML entered will be passed to the template unmodified but Confluence specific mark up such as macro definitions will be rendered.
