

Render contents if the user is in security group

This macro renders its content only if current user is in the configured security group

Code is really simple and goes like this

```
## @param SecurityGroup:title=Security group|type=string|required=true|desc=Security group to check for membership

#if(${action.authenticatedUser} && ${userAccessor.hasMembership(${paramSecurityGroup}, ${action.authenticatedUser.name})})
${body}
#end
```

Complete macro configuration looks like this

Macro Browser Information

Macro Name
Macro names are converted to lower case

Visibility ☒ Visible to all users in the Macro Browser
☐ Visible only to system administrators in the Macro Browser

Macro Title

Description

Categories

Administration
Communication
Confluence content
Development
External content

Icon URL
Absolute URL (e.g. <http://mysite.com/myimage.png>), or relative to the Confluence base URL (e.g. /images/logo/confluence_48_white.png)

Documentation URL

Definition of User Macro

Macro Body ☐ No macro body

Processing ☐ Escaped
☐ Unrendered
You should use this option for bodies that are processed within the template before being output. Ensure that HTML is ultimately output by the template.
☒ Rendered
The body will be rendered so most HTML entered will be passed to the template unmodified but Confluence specific mark up such as macro definitions will be rendered.

Template

```
#if(${action.authenticatedUser} && ${userAccessor.hasMembership(${paramSecurityGroup}, ${action.authenticatedUser.name})})
${body}
#end
```

[See the documentation.](#)

Example usage

Shows content if current user is in security group | SecurityGroup = confluence-administrators

Info

Hello, you are in the group

The info block with the message "Hello, you are in the group" will be shown only to the users who are in "confluence-administrators" group
