

# Why do I see an extra button with + sign on my form and ownedBy field

The question been asked many times, especially by the new users of ConfiForms add-on for Confluence.

And also the related question - why I see this strange button on my page?

Both elements are **special tools visible ONLY to administrators of the form**. Not visible to form super users, neither it is visible to normal users. See more details about "who is the form administrator" here: [Confluence page permissions and ConfiForms](#)

- The "+" button shows you the metadata fields for the record you are viewing
- The button with a "cog wheel" and the name of your form provides an auto-generated admin view over your stored data, and also quick links to [Migration and Recovery API](#) and [Import API](#)

 These UI elements are **NOT VISIBLE** for ordinal users of your form.

 Since ConfiForms version **2.14.1** you can turn off metadata fields for all users by default (via ConfiForms Registrations Control (FormView) macro parameter)

## Insert 'ConfiForms (FormView) Re

☐ Hide metadata section on the form

By default, the form renders a section for form administrators to see (and modify) records metadata fields. You can disable this here

 You can turn off form's admin UI via ConfiForms Form Definition parameter (since ConfiForms version **2.24.2**)

## Insert 'ConfiForms Form Definition' Macro

☐ Hide form admin UI

By default ConfiForms renders admin UI for form administrators. You can disable it here

Preview

Also, you are always free to choose where to place your ConfiForms Form definitions and where to have "views" over the data and form views. See more on [Multiple ways to show your form data in Confluence with ConfiForms](#)
