# Show assets on Jira dashboards

You can add AssetForms views as gadgets to systems and other dashboards in Jira.
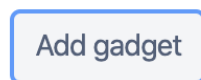

Choose "Dashboards"

Jira Software

- Your work
- **Dashboards**
- Projects
- Filters
- People
- AssetForms for Jira
- Jira settings

Then Click on "..." and select "Edit dashboard"

Copy dashboard

Edit dashboard

Find dashboard

Create dashboard

Click on "Add gadget"

Add gadget

And select "AssetForms for Jira" in the dialog you see

Add a gadget

Search

CATEGORIES

All   3

JIRA   3

⚠ **More gadgets available**

Additional gadgets have been found and can be loaded.

Load all gadgets

⌄ **Select view**

New Asset View

Introduction ···

Welcome to JIRA

Not sure where to start? Check out the Jira 101 guide and Atlassian training course.

You can customize this text in the Administration section.

We have already created a view for "All computers" and selected that from the list

System Dashboard

AssetForms: all computers ···

Name*	All computers
	Name of the asset view
Asset type:*	Computers (CMP) ⌄
View type*	TableView ⌄
	Asset view type
Description	
	Description for your asset view
Filter	
	Filter for the asset view
Apply distinct filter	
	Field names as comma separated list to be used as a key for applying distinct filter
Ordering/Sorting rules	
	You can user SQL-like syntax: fieldname1 ASC, fieldname2 DESC, etc. Also limiting the number of records returned by using LIMIT n operator: fieldname1 ASC LIMIT 2
Limit a number of records	
	Limit a number of records returned (a number). No limit when is blank
Enable export	☐
	Check to enable export to CSV and Excel file.
Display create new asset button	☑
	Check to display 'Create new asset' button beside the view and define the label for it.
Create new asset button label	add new computer
	Check to display 'Create new asset' button beside the view and define the label for it.
Display edit asset button	☑
	Check to display 'Edit asset' button for each asset in the view.
Display delete asset button	☑
	Check to display 'Delete asset' button for each asset in the view.

We select just 3 fields to show on this view

Fields

Name or expression *

```
key
```

Field name or expression. You can use virtual functions to transform field's value on render

Label

```
Key
```

You can override field's label here

CSS styles

```

```

CSS styles to apply on field value

Name or expression *

```
name
```

Field name or expression. You can use virtual functions to transform field's value on render

Label

```
Name
```

You can override field's label here

CSS styles

| Key (key) |
| Name (name) |
| Manufacturer (manufacturer) |
| ✓ Stock number (stockNumber) |
| Lenovo monitor (lenovoMonitor) |
| Monitor (monitor) |
| Keyboard (keyboard) |
| Mice (mice) |

Fields   Add Field

And click on "Save" button

And our asset view is shown here, on system dashboard in Jira.
