

# How to synchronize assets in AssetForms with your Jira

By default all the assets stored with AssetForms are synchronized with Jira asset API. This can be disabled at any time if necessary and enabled at any time.

If you want to make sure all the assets and their types are synchronized with Jira you can do it by using "Synchronization" menu item

You will be presented with a list of asset type to synchronize

Select the ones you want to synchronize and click on "Sync" button
