

# Easy and quick way to make your ConfiForms faster

Very often in the solutions we do for our customers (see [Consulting services](#) we provide) we suggest and use the [Cache macro from Appfire](#).

It works well for us and our customers. Especially on "heavy pages" like reporting pages and pages that aggregate and show lot's of ConfiForms data

See more on Appfire's website <https://www.appfire.com/resource/how-vertuna-llc-improves-page-performance-and-load-times-on-data-heavy-confluence-pages/>
