Using JavaScript from Field rule to hide Save button

When you click on "Confirm" a Save button will appear

Done with the help of this Javascript

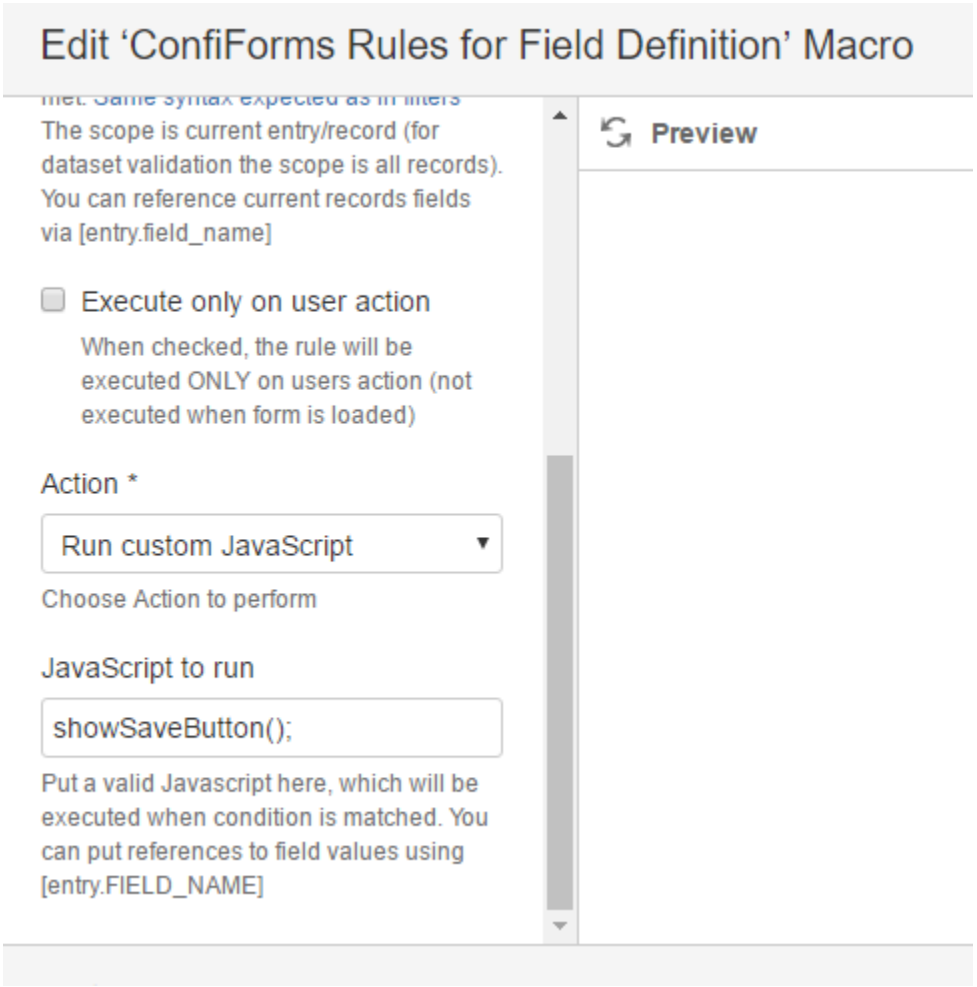

```
<script>
function showSaveButton(){
  AJS.$('button.save-cf-btn').show();
}

function hideSaveButton(){
  AJS.$('button.save-cf-btn').hide();
}
</script>
```

and 2 field definition rules:

Set on field "confirm" and Condition is set to

```
confirm:true
```

Another rule

Set on field "confirm" and Condition is set to

```
confirm:false
```
