

# Linking assets to Jira issues

With AssetForms for Jira you can link (or associate) assets with Jira issues.

This is done by adding

- Jira issue
- Jira issue (multi-select)

field types into your asset type.

For example

### Fields

You can re-arrange fields order by using drag & drop

☰

Name\*  ▼

---

☰

Referenced Jira issue  ▲ ✖

#### Field properties

Field name\*   
Name of the field to be used when writing conditions / filters

Field label\*   
Label is shown next the the field control

Is required   
When the field is set as required, the field's label will have the "\*" sign added and the form will not accept empty values for this field

Field description   
Description is an explanatory text shown under the field

CSS styles   
CSS styles to apply on field

Field types ▼

And when creating an asset and selecting the Jira issue key (or multiple) you can associate this asset with selected Jira issue

## Asset

Asset type: VEH - Vehicles

Name\* Porsche Taycan review

Referenced Jira issue size

- FORMS-18 Review how size is ...
- ABI-6 Show item's SIZE when ...

[Save](#) [Cancel](#)

Browse to issue in Jira and go to a issue detailed view  
Associated assets are visible on the Jira issue view on the right

### Linked AssetForms Assets

Open Linked AssetForms Assets

And clicking to open this view you will see linked assets

## ← Linked AssetForms Assets

**VEH-1 Porsche Taycan review**

This is how you can associate assets with Jira issues.

And of course! You can easily modify the linked asset right from the presented panel!
