

# Page watermark

Shows watermark on the page

See the message on bottom right saying "All content on this page is confidential"

This is shown using this macro

Note that we use

```
$generalUtil.escapeXml($paramMessage)
```

to sanitize the user's input and make macro safer for XSS vulnerabilities

```
## @param Message:title=Name|type=string|required=true|desc=Watermark message

<style type="text/css">
  .page_watermark {
    position:fixed;
    bottom:55px;
    right:15px;
    opacity:0.5;
    z-index:99;
    color:#FC0202;
    font-weight:bold;
    font-size:larger;
  }
</style>

<div class="page_watermark">$generalUtil.escapeXml($paramMessage)</div>
```

**All content on this page is confidential**

## Macro Browser Information

Macro Name \*

Macro names are converted to lower case

- Visibility  Visible to all users in the Macro Browser  
 Visible only to system administrators in the Macro Browser

Macro Title \*

Description

Categories

Icon URL

Absolute URL (e.g. <http://mysite.com/myimage.png>), or relative to the Confluence base URL (e.g. [/images/logo/confluence\\_48\\_white.png](/images/logo/confluence_48_white.png))

Documentation URL

## Definition of User Macro

Macro Body  No macro body

- Processing  Escaped  
 Unrendered

You should use this option for bodies that are processed within the template before being output. Ensure that HTML is ultimately output by the template.

- Rendered

The body will be rendered so most HTML entered will be passed to the template unmodified but Confluence specific mark up such as macro definitions will be rendered.

Template \* 

```
## @param Message:title=Name|type=string|required=true|desc=Watermark message

<style type="text/css">
.page_watermark {
  position:fixed;
  bottom:55px;
  right:15px;
  opacity:0.5;
  z-index:99;
  color:#505050;
```
