

Show current timestamp on the page

This simple user macro renders current timestamp on the page (please note that it uses server's time)

Online demo

Tue Apr 16 22:50:08 EEST 2024

User macro code

```
## @noparams

$content.currentDate
```

Full configuration

Macro Browser Information

Macro Name*

Macro names are converted to lower case

Visibility ☒ Visible to all users in the Macro Browser
☐ Visible only to system administrators in the Macro Browser

Macro Title*

Description

Categories

Administration
Communication
Confluence content
Development
External content

Icon URL
Absolute URL (e.g. http://mysite.com/myimage.png), or relative to the Confluence base URL (e.g. /images/logo/confluence_48_white.png)

Documentation URL

Definition of User Macro

Macro Body ☒ No macro body

Processing ☐ Escaped

☐ Unrendered
You should use this option for bodies that are processed within the template before being output. Ensure that HTML is ultimately output by the template.

☐ Rendered
The body will be rendered so most HTML entered will be passed to the template unmodified but Confluence specific mark up such as macro definitions will be rendered.

Template*

```
## @noparams

$content.currentDate
```

Also you can extend this to print out date and time using formatting options you have configured in your Confluence and in user's timezone

```
$action.dateFormatter.formatDateTime($content.currentDate)
```
