Categories
```
Administration
Communication
Confluence content
Development
External content
```

Icon URL

Absolute URL (e.g. http://mysite.com/myimage.png), or relative to the Confluence base URL (e.g. /images/logo/confluence_48_white.png)

Documentation
URL

Definition of User Macro

Macro Body
Processing
● No macro body
○ Escaped
○ Unrendered

You should use this option for bodies that are processed within the template before being output. Ensure that HTML is ultimately output by the template.

○ Rendered

The body will be rendered so most HTML entered will be passed to the template unmodified but Confluence specific mark up such as macro definitions will be rendered.

Template*
```
## @noparams

$content.currentDate
```

ℹ Also you can extend this to print out date and time using formatting options you have configured in your Confluence and in user's timezone

```
$action.dateFormatter.formatDateTime($content.currentDate)
```
