

Tracking user and last updated time

This form tracks the who has changed the data and when, and this is done conditionally, when the checkbox field is checked

Also, it shows how to set the date to be in the future from *now* - Due date is set automatically to +14 days from now

If you are unfamiliar with ConfiForms IFTTT rules and want a more detailed and a step by step solution then have a look at this simplified one: [Tracking last updater](#)
