

Creating quick feedback forms with ConfiForms - user macro source code

[illegible]

[illegible]

```

<div class="lui-message lui-message-info closeable shadowed success">
  <p>Thank you for your feedback</p>
</div>
</div>

#set( $D = '$' )
#set( $ajaxCallHtml = 'AJS.$.ajax({url: AJS.params.contextPath + "/ajax/confirms/rest/save.action?
storagePageId='+${cfPageId} + '&pageId=" + AJS.params.pageId + "&f="+${!{paramFormName}}+'&choice=" + dc, type:
"GET", success: function() { AJS.$("#thankumsg_'+${!{paramFormName}}+").show(); window.setTimeout(function () {
AJS.$("#thankumsg_'+${!{paramFormName}}+").fadeOut("slow");}, 2000);}});')

<script type="text/javascript">
  AJS.toInit(function() {
    AJS.$D('.cf_quickfeedback_'+${!{paramFormName}}).find('img').click(function() {
      var dc = AJS.$D(this).attr('data-choice');
      ${ajaxCallHtml}
    });
  });
</script>

<style type="text/css">
  .user-choice-cf p img {
    opacity: .7;
  }
  .user-choice-cf p: hover img {
    opacity: 1;
    -webkit-transition: .3s ease-in-out;
    transition: .3s ease-in-out;
  }
</style>

```
