

How to setup a rule to allow only one record per user per form

The screenshot below shows how to setup the form to allow only one record per user (registered user) and how to set it up to allow access to only OWN record

Edit 'ConfiForms Form (Definition)' Mac

☐ Enable secure storage for attachments (files)
Files will be stored in sub-pages with restricted access

☐ Lock form
Lock the form to disable new registrations

Message to show when the form is locked

☒ Enforce one entry per user

☒ Shows only own records to form non-admin users
Form admin users are the ones you have been explicetely set as form admins, or are systems adminintrators in Confluence, or have edit permissions on the page where the form is
