Consulting services

Quite often we are asked if we **provide consulting and support services** for our plugins and around Atlassian tools in general... and the answer is - **yes, we do**!

Send us a message to vertuna@vertuna.com or use our Support Request Form to contact us.

You are very welcome!

We can help you with

- Setting up your Confluence or Jira system and helping with administration
- We provide tailor development services for all Atlassian software, both, for on-prem (server/data center) and for cloud
- Helping with configuration and integrations
- Building custom solutions with help of our add-ons and other 3rd party add-ons from Atlassian Marketplace (+ development of truly custom add-ons for your special needs)
- Helping you to validate your solutions and choices and advising on improvements (Atlassian ecosystem)

We are **Atlassian Verified (now Atlassian Silver Partner)** and have been working with Atlassian tools for the last **9** years
