Include and show JSON data from JIRA with ConfiDoc

We use Atlassian JIRA here and enable lookup UI on our ListView macro

Live DEMO below:

| Parameter	Value	Query
JIRA Issue key		**JIRA**

CONFSERVER-36424

> ⓘ   {panel:bgColor=#e7f4fa} *NOTE:* This suggestion is for *Confluence Server*. Using *Confluence Cloud*? [See the corresponding suggestion|http://jira.atlassian.com/browse/CONFCLOUD-36424]. {panel} See CONF-25086 which was marked as fixed, but was not complete. Add a Content representation with embedded styles, similar to SOAP API.

We use ListView with custom body layout, like this:

The service we use is Atlassian JIRA and it is defined in ConfiDoc configurations like this:

Very simple, no auth and uses just one parameter [KEY]

We use it with ConfiDoc's ListView macro

Edit 'ConfiDoc ListView Macro' Macro
