

Dynamic Filters with ListView and TableView

This is a demo of a ConfiForms ListView having a ConfiForms TableView inside and using the field value of the record it is currently showing to show the related data from the other form in a TableView

2 forms - "choices" and "using"

Field in "using" form is a smart dropdown referencing choices from a first form, "choices"

Contents

Just a choice
Apple
Orange
Blueberry

Contents

Choice	Some text field
Apple	Green
Orange	As you all know
Blueberry	Surprisingly blue
Apple	Red

Using ListView and TableView to show the results of BOTH forms , and the table is filtered by the current record shown in the ListView

Start typing to see options...

Just a choice

Filter

Apple

Some text field
Green
Red

Orange

Some text field
As you all know

Blueberry

Some text field

Complete solution

```
