# Using ConfiForms status fields in filters

Status fields are teh special case in ConfiForms and their values are constants. See Documentation

Status	5.0 +	This field type permits easy grouping and presentation for entered data. Each status level is color-coded to foreground data groupings.
		Important
		Filtering by the status field can be a bit complex because each color has a constant value which is stored with the data according to this pattern:

Color	Constant
DEFAULT	default
ERROR	error
CURRENT	current
SUCCESS	success
COMPLETE	complete
MOVED	moved

Status field has the followng statuses and is called "statusField"

All fields

My status field	My text field
GREY	just grey
THE GREEN ONE	with gree status
RED ALERT	red red code red
GREY	

filtered by "status value GREEN" (constant success)

```
statusField:success
```

My status field	My text field
THE GREEN ONE	with gree status

filtered by "status value GREEN" (constant success)

```
statusField.label:red alert
```

My status field	My text field
RED ALERT	red red code red
