Data export for ConfiForms CLOUD

In addition to REST API for ConfiForms CLOUD you may want to use services that export ConfiForms data in different than JSON formats

We offer 3 formats:

- CSV
- Excel
- RAW (ConfiForms internal format, useful for use with Migration and Recovery API to restore/recover form's data if/when needed with complete copy)

The endpoint to use is https://app.confiforms.net/export/api/v1

Please note that auth is done the same way as on REST API for ConfiForms CLOUD and you need to generate an API access token as explained on the mentioned page

URL	Method	Details

/download/{pageId}/{formName}
 	
(in this case set *Auth-Token* header)
 	
/download/{pageId}/{formName}/{token}
	GET	Request parameters (both optional):
		
		• *format* - Supported values:
		  ◦ excel
		  ◦ **csv** - default format
		  ◦ raw
		  ◦ json
		• *query* - ConfiForms Filters type of expression, url encoded. If left empty then all records are returned
		• *fields* - used to decorate and transform the returned values with Virtual functions. Use "," to separate field decoration instructions.

Example:

```
https://app.confiforms.net/export/api/v1/download/123456/myform/xxx-xxx-xxx-xxx?format=csv&query=sum%3A%3E350%20AND%20type%3AInvoice

(sum%3A%3E350%20AND%20type%3AInvoice is an encoded value of sum:>350 AND type:Invoice)
```
